

FACE PLATE 4 PORT

Raxxes™ US faceplates offer a sleek, clean appearance for mounting modular jacks. Designation labels cover the mounting screws (included) and provide ample circuit identification. Write-on circuit designation labels protected by clear plastic cover located over the mounting screws. Faceplates are available in white, modular bezels (ordered separately) are available in red, green, blue, yellow, black and white for color segmentation if being used in network design. Standard white comes with face plate. UV resistant, high impact plastic prevents color fading and provides added durability. The US Style modular faceplates combine high capacity with aesthetics providing a fresh look to match today's technologies. Its durable finish masks minor scuffs that may occur during daily usage. The face plate is available in 4 port version only and comes with blank module bezels (ordered separately) to hide vacant port when less than 4 ports are being used.
